Currently DR AS/CA S035:2025 Draft Australian Standard – Requirements for Installation of Temporary Field Telecommunications Customer Cabling for Defence Purposes is also under review listing a number requirements that do not strictly meet AS/CA S009 criteria. To give clarity to cabling installation guidance and normalise cross Standard guidance, it would be prudent to:

- a. add a clause to S009 that cross references AS/CA S035:xxxx as the principal authority for the installation of temporary field communications customer cabling for Defence purposes, and
- b. add AS/CA S035:2025 to the S009 Reference List and Bibliography.
