

TELSTRA GROUP LIMITED

Submission to ATA Consultation:

**AS/CA S008:2020 Requirements for Customer Cabling Products
AS/CA S009:2020 Installation Requirements for Customer Cabling
(Wiring Rules)**

Public Submission

19 September 2025

1 Introduction

We welcome the opportunity to provide our views to the ATA's consultation on **AS/CA S008:2020 (Requirements for Customer Cabling Products)** and **AS/CA S009:2020 (Installation Requirements for Customer Cabling (Wiring Rules))**

2 AS/CA S008:2020 (Requirements for Customer Cabling Products)

Telstra is generally satisfied with the current content as is and we have no further comments.

3 AS/CA S009:2020 Installation Requirements for Customer Cabling (Wiring Rules)

Telstra is generally satisfied with the current content. We do have some callouts:

- Non-section specific comment: we feel that clarification or guidance regarding encountering *in situ* cabling and supporting legacy hardware (e.g. including but not limited to MDFs) may be useful.
- Section 13 Main Distribution Frame (MDF): Field services teams have found multiple occurrences of legacy MDFs in the field that do not comply with sections 13.4(e), 13.9, and 13.12.
