Publications Register

Last updated: 12 March 2026

NOTES:

- **Communications Alliance changed its name to Australian Telecommunications Alliance on 20 June 2025 but remains the same legal entity (same ABN/ACN). Existing Codes, Standard and Guidelines have <u>not</u> been amended to reflect this name change but remain valid and, where applicable, enforceable. These documents will be updated to reflect the name change in due course.**

- **Please refer to Appendix 1 for explanations on the development, review and referencing conventions for Codes, Standards, and Guidelines.**

- **Useful acronyms/abbreviations (non-technical, non-exhaustive)**:

ACIF = Australian Communications Industry Forum (in 2006, ACIF and the Service Providers Association Inc (SPAN) merged to form Communications Alliance)

ACMA = Australian Communications and Media Authority (regulator)

AS = Australian Standard

ATA = Australian Telecommunications Alliance

CA = Communications Alliance

CECRP = Customer Equipment and Cable Reference Panel (ATA)

CSRP = Communications Security Reference Panel (ATA)

eSafety = Office of the eSafety Commissioner (regulator)

ICAG = Industry Consumer Advisory Group (ATA)

NRP = Network Reference Panel (ATA)

ORP = Operations Reference Panel (ATA)

RP = Reference Panel (ATA)

WC = Working Committee (ATA)

REGISTERED CODES

Codes may be accompanied by/related to a Guideline. Where this is the case, this has been indicated in **blue**.

Reference related Guideline	Title related Guideline	Registration / Variation/ Reconfirmation	Status	Reference Panel / Working Committee

N/A	Consolidated Industry Codes of Practice for the Online Industry (Class 1A and Class 1B Material) (consisting of Head Terms and 8 Schedules for 8 sections of the online industry)	June 2023: Social Media Services, App Distribution, ISP, Hosting, Equipment; Sept 2023:Search Engine Services	Next review: June 2025.	CSRP
N/A	Consolidated Industry Codes of Practice for the Online Industry (Class 1C and Class 2 Material) (consisting of Head Terms and 3 Schedules for the following sections of the online industry: Internet Carriage Services, Hosting Services, Search Engine Serves)	27 June 2025	Next review: July 2027	CSRP
N/A	Consolidated Industry Codes of Practice for the Online Industry (Class 1C and Class 2 Material) (consisting of Head Terms and 5 Schedules for the following sections of the online industry: Social Media Services, Relevant Electronic Services, Designated Internet Services, App Distribution Services, Equipment)	Pending registration decision by eSafety	TBC	CSRP

UNREGISTERED CODES

In rare circumstances, in the past, a Code has been developed (and remains valid) but was not registered (without a corresponding instrument being made by the ACMA).

Reference	Title	History	Status	Reference Panel / Working Committee
C524:2013	External Communication Cable Networks	1999 2001 2004 2013 Reconfirmed April 2023	Next review: April 2028	ORP
C569:2015	Unconditioned Local Loop Service (ULLS) Ordering, Provisioning and Customer Transfer	2001 2005 2015 Reconfirmed April 2021	Next review: April 2026	ORP

Setting The Standard.
Driving Progress.

DEREGISTERED CODES

Deregistered documents may be available upon request. Please contact us if you have a specific request.

Reference	Title	History	Status	Reference Panel / Working Committee
C518:2006	Call Charging and Billing Accuracy	1998 2000 2006 Reconfirmed 2011 Deregistration May 2023	Deregistered	NRP / ORP
C522:2007	Calling Number Display	2000 2001 2003 2007 Registration Oct 2016	Deregistered	ORP
C554:2004	Rights of Use of Premium Rate Service Numbers	2004 Reconfirmed 2007 Deregistration June 2023	Incorporated into C566:2023	ORP
C559:2012	Unconditioned Local Loop Service (ULLS) – Network Deployment	2001 2002 2003 2005 2006 2012 Reconfirmed 2018	Preparing submission for de-registration to ACMA.	NRP

REGISTERED STANDARDS

Standards may be accompanied by/related to a Guideline. Where this is the case, this has been indicated in **blue**.

Reference (AS/ACIF, AS/CA or AS/ATA)	Title	Publication / Reconfirmation	Supersedes upon registration/ gazettal)	ACMA regulatory status **R: Registered G: Gazetted P: Published**	Status	Reference Panel / Working Committee

REGISTERED CODES

Explanation:

- Industry Codes (Codes) are developed and reviewed by ATA in accordance with the processes described in the Operations Manual and the Document Maintenance Policy and Process document.

- Codes are submitted to the ACMA for registration in accordance with Part 6, Division 4 of the *Telecommunications Act 1997* (Act). If accepted for registration, the Code becomes enforceable by the ACMA. Online Safety Codes are submitted to the Office of the eSafety Commissioner for registration under the Part 9, Division 7 of the Online Safety Act 2021. Processes apply accordingly. There is no denomination convention.

- A Code will be reviewed at regular intervals as stipulated in the respective Code.

- A review of a Code results in one of the following:

  o Reconfirmation – no changes to content, Code remains registered. No consultation is required.

  o Revision – substantive amendment(s) to content with Terms of Reference pertaining to the entire Code. The revised Code is submitted to the ACMA for re-registration. Public consultation (Part 6, Division 4 of the Act) is required.

  o Variation – amendments to specific parts of the Code. The varied parts of the Code are submitted to the ACMA for incorporation into the existing registered Code. Public consultation (Part 6, Division 4 of the Act) is required.

  o Minor variation – minor amendments to specific parts of the Code, the varied parts of the Code are submitted to the ACMA for incorporation into the existing registered Code. A minor variation does not require public consultation. Whether proposed amendments qualify for a minor variation remains within the ACMA's discretion.

  o Decision to seek deregistration – content no longer relevant, the Code is submitted to the ACMA for deregistration. Public consultation is required.

- Code reference:

  o CXXX:YEAR [Code Name] (e.g. C513:2015 Customer and Network Fault Management)

  o The reference reflects

    ▪ the number of the Code (e.g. C513), allocated in ascending order (originally starting with 500); and

    ▪ the year of last approval for submission for registration to the ACMA by the ATA Board (upon recommendation by the responsible WC).

  o A reconfirmed Code retains the year of the last approval, e.g. Code C513:2015 was reconfirmed in 2021 (with an unchanged designation, reflecting the fact that no changes have been made).

  o Occasionally, where a Code has been approved for submission for registration by the WC/ATA Board but was only registered by the ACMA in the following year, the year of registration may differ from the year contained in the Code reference (e.g. Code C513:2015 was last approved for registration by the WC/ATA Board in 2015 and registered by the ACMA in 2016).

- o Variations are indicated as follows: CXXX:YEAR [Code Name] incorporating Variation No. X/YEAR OF VARIATION (with the year in CXXX:YEAR reflecting the year of last approval of the <u>entire</u> Code by the WC/ATA Board), e.g. C628:2015 incorporating Variation No. 1/2018 was last approved in its entirety in 2015, with parts varied in 2018.

  - o A Code always maintains its Code number (CXXX), irrespective of the outcome of a review.

- Exception: Online Safety Codes are submitted to the eSafety for registration under the Part 9, Division 7 of the *Online Safety Act 2021*. Equivalent processes apply. There is no Code referencing convention.

- Codes may be accompanied by/related to a Guideline. Where this is the case, this has been indicated in **blue**.

REGISTERED STANDARDS

Explanation:

- Customer Equipment and Cable Standards (Standards) are developed and reviewed by the ATA in accordance with the processes described in the Operations Manual and the Document Maintenance Policy and Process document.

- Standards are submitted to the ACMA, to be called up by the ACMA as technical Standards, which are then made in accordance with Part 21, Division 3 of the *Telecommunications Act 1997* (Act). If accepted for making, an ACMA technical Standard becomes enforceable by ACMA once registered on the Federal Register of Legislation.

- The Standard becomes an applicable Standard (via the referenced technical Standard) under the ACMA *Telecommunications (Labelling Notice for Customer Equipment and Customer Cabling) Instrument 2025*.

- A Standard will be reviewed at regular intervals as stipulated in the Document Maintenance Policy and Process document.

- A review of a Standard results in one of the following:

  - o Revision – the entire publication is subject to revision. The revised Standard is submitted to the ACMA for making. Public consultation (Part 21, Division 3 of the Act) is required.

  - o Amendment – a specific element of the Standard is subject revision. The Amendment automatically becomes a part of the applicable Standard without any further regulatory processes.

  - o Reconfirmation – the publication is reconfirmed as still being applicable under the Act and the content remains unaltered.

  - o Withdrawal – the content is no longer relevant as an applicable Standard under the Act. The Standard is removed from the list of ATA publications.

  - o Classified as 'Available Superseded'– the Standard remains as an applicable Standard once the new edition of the Standard is published. The overlap period in which both the Available Superseded Standard and the new edition of the Standard are applicable is 12 months, unless otherwise specified in the new edition of the Standard.

- Standard reference:

- o AS/CA SXXX:YEAR [Standard Name] (e.g. AS/CA S042.1:2025 Requirements for connection to an air interface of a Telecommunications Network— Part 1: General)

- o The designation reflects

    - ▪ the number of the Standard (e.g. S042), allocated in ascending order (starting with 1); and

    - ▪ the year that the Standard was published.

- o A reconfirmed Standard retains the year that it was last published, e.g. Standard AS/CA S002:2010 was reconfirmed on 2 May 2023 (with an unchanged designation, reflecting the fact that no changes have been made).

- o A Standard always maintains its Standard number (SXXX), irrespective of the outcome of a review.

- Amendments are indicated as follows: Amendment No. X/YEAR OF AMENDMENT to AS/CA SXXX:YEAR reflecting the year it was last published, e.g. Amendment No. 1/2025 to AS/CA S008:2020 Requirements for Customer Cabling Products was published in 2020 and amended in 2025.

- Standards may be accompanied by/related to a Guideline. Where this is the case, this has been indicated in **blue**.

PUBLISHED (ACTIVE) GUIDELINES

Explanation:

- Guidelines cover a range of topics, including operational, technical or consumer-related matters. They are intended to provide guidance and/or best practice.

- Compliance with Guidelines is voluntary. However, Guidelines or parts thereof may be enforceable through reference in a commercial agreement/contract or through formal adoption by a regulator, e.g. the ACMA.

- A Guideline will be reviewed at regular intervals as indicated in the respective Guideline or as required, often in parallel or shortly after a review of an accompanying/related Code/Standard.

- Guideline referencing conventions are equivalent to those of Codes/Standards.

- Guidelines may be 'stand-alone' or accompany/relate to Codes or Standards. Where this is the case, this has been indicated in **blue**.
